

EADMIN is a complete on-line solution for adult website(s) or adult content owners

Update all your member areas from one web based interface. Automatically update with text, images and videos. Let us provide you with complete technical background and support!

The EADMIN basic package consist of:

- content management system
- adult website design + affiliate program website design
- dedicated internet connection
- technical solution (servers, housing)
- additional services and support

Content management system (EADMIN)

Site owner uploads new content (photos, videos) to CMS data storage. Than he creates new site items in simple, visual way, using his internet browser.

Available site items:

- models
- news
- blog posts (diary, fans forum, ...)
- e-cards (choose images from CMS data storage)
- wallpapers (choose images from CMS data storage)
- photo and video updates (choose images and videos from CMS data storage)
- photo and video free hosted galleries (choose images and videos from CMS data storage)
- pictures of the day

Every other aspect of site operation is automatic: making PDFs and ZIPs, image resizing, image watermarking, model index, model and issue rating (based on users preferences), video screenshots generating, RSS feeds, issue and FHG rotation, newsletters generating and sending. EAdmin supports flash video previews.

Adult website design + affiliate program website design

We will prepare complete website design and affiliate program website design. We will implement these designs to content management system templates and start active website. There will be working and separated guests and members areas. We will implement chosen billing processor and ensure data security.
